5 - Performance fees

The Management Company may receive a performance fee out of the assets of the relevant Sub-Fund.

The Management Company will charge an outperformance fee when there is a positive return compared to the benchmark; then the fee is calculated as follows: for each valuation period during which the calculated return is greater than that of the benchmark, an outperformance fee is deducted as set out in the table above.

The outperformance in the reference currency represents the difference between:

- the Net Asset Value per Share (the "NAVPS") on a particular day, including fixed fees (management fees, administration fees, subscription fees), but not including any provisions for cumulated previous outperformance fees;

and

- the theoretical composite indexed NAVPS on that same day including the composite index's performance and the effects of subscriptions and redemptions.

The outperformance fee is provisioned for on each NAVPS calculation date. Accounting for outperformance fee provisions includes both allocations and reversals, as a reversal could occur if the return difference calculated on a particular day is negative. Provisions are limited at zero (no negative provisions). When performance since the start of the Valuation Period is negative, provisions for outperformance fees are limited to a maximum of 1.00% of the Net Asset Value, except for OFI FUND-Euro Breakeven Inflation for which the maximum is 0.50%.

When calculating this return, by "valuation period" the Sub-Fund's fiscal year is taken into consideration. The calculation is reset to zero at the beginning of each fiscal year.

The Management Company has implemented a swing price mechanism and the performance fee is charged on the basis of the unswung NAV.

The outperformance fees rates by class of Share for each Sub-Fund, are set out in the following schedule:

Sub-Funds may suffer a reduction of their Net Asset Value ("NAV") as a result of direct and indirect transaction costs incurred due to the purchase and selling of underlying securities caused by the investors' subscriptions and redemptions requests. This is known as dilution. To reduce the impact of such dilution and protect the interests of existing shareholders, the Company has implemented a swing pricing mechanism where a Sub-Fund's NAV price is adjusted downwards or upwards in order to ensure that the cost of the underlying portfolio activity is borne only by those investors who ask the respective subscriptions / redemptions and not by the rest of the existing shareholders.

If one day of a NAV calculation the net amount of subscription / redemptions orders on all share classes exceeds a preset threshold, which is determined by the Management Company upon objective criteria and expressed as a percentage of a Sub-Fund's NAV, the NAV may be adjusted upwards or downwards respectively in order to take into account the costs of the adjustment attributable respectively to the orders for subscriptions / redemptions.

The NAV of each class of shares is calculated separately however any adjustment will have, in percent, the same impact on the total NAV of the Sub-Fund. The Management Company determines, on a regular basis, the costs and thresholds on the base of, amongst others, transactions costs, buy-sell spreads as well as any taxes applicable to the Company.

To the extent that this adjustment is related to the net balance of subscriptions / redemptions in the Sub-Fund, it is not possible to accurately predict whether such swing pricing will apply at some point in the future. Therefore, it is not possible to accurately predict how frequently the Management Company will make such adjustments. Investors should note that the volatility of the NAV may not only reflect that of the securities in the portfolio due to the implementation of swing pricing as explained before.

The Management Company may decide on exceptional cases (e.g. mergers, liquidations, launch of new Sub-Funds) to suspend the application of the swing price mechanism.

The Sub-Fund OFI FUND- Global Convertible Bond is the only Sub-Fund submitted to swing price policy.

At period-end, no swing price has been applied.

The maximum Swing factor applicable during the period ended June 30, 2020 is 1.12% of the Net Asset Value of the Sub-Fund.

14 - COVID 19

Beginning in January 2020, global financial markets have experienced and may continue to experience significant volatility resulting from the spread of a novel coronavirus known as COVID-19. The outbreak of COVID-19 has resulted in travel and border restrictions, quarantines, supply chain disruptions, lower consumer demand and general market uncertainty. The effects of COVID-19 have and may continue to adversely affect the global economy, the economies of certain nations and individual issuers, all of which may negatively impact the Fund's performance.

As of the end of Q2 2020, markets have somewhat recovered from the worst of the downturn experienced in late March, early April, but uncertainties remain high, most importantly in the US where the first wave of COVID-19 doesn't seem to have been fully handled and new cases and deaths are rising since the beginning of June. This put further risks on a global economic recovery which could in turn impact financial markets negatively and thus the performance of the Sub-Funds as well.
