

MANAGEMENT DIRECTION

Management objective

The management objective is to offer unit-holders synthetic exposure to the Basket Precious Metals Strategy index (Bloomberg code OFIBPMS Index) or an index with the same composition. This index is representative of a basket made up of precious metals futures contracts and interest rates futures contracts. The Fund shall replicate both upward and downward fluctuations in this index.

Benchmark

There is no benchmark; however, for information, the investor may consult the GSCI Precious Metals TR index, which is representative of a universe of investment in precious metals, limited to gold and silver. Fluctuations are calculated based on prices recorded in USD. This index is a total return index.

It should be reiterated that the comparison index, the GSCI Precious Metals TR index, does not have the same composition as the Basket Precious Metals Strategy index to which the Fund is permanently exposed, which may lead to differences in terms of performance achieved.

Management strategy

The investment strategy consists of setting up a basic long position based on swaps on the Basket Precious Metals Strategy index. This index is made up of futures contracts on the main precious metals and on interest rates with the following allocation: 35% Gold - 20% Silver - 20% Platinum - 20% Palladium - 5% 3-month Eurodollar.

The technical rebalancing of the index between these various components is carried out every day. The list of markets is not exhaustive.

The Fund may also resort to other indices with a more or less identical composition, issued or not by OFI ASSET MANAGEMENT.

For more information about the index used, the investor is invited to contact OFI ASSET MANAGEMENT.

Futures contracts on commodities and on interest rates may be quoted in various currencies, since, in order to hedge the index against the foreign exchange risk, a strategy of neutralisation of the foreign exchange effect is systematically implemented once a day.

The Fund exposure target is 105%.

The main categories of assets used: The Fund portfolio is invested through performance swaps (swaps traded OTC) on an index of futures contracts on commodities. It may hold 0% to 100% of its assets in term deposits and transferable securities of private or public issuers, rated at least Investment Grade and with a maturity of less than 1 year. It may invest up to 10% of its assets in units of UCITS or AIFs satisfying the four criteria (Art. R214-13 of the Monetary and Financial Code). Deposits of a maximum term of 12 months, with one or more credit establishments, are authorised within the limit of 100% of the assets. The Fund may temporarily resort to cash borrowing within the limit of 10% of the assets of the Fund.

Risk profile

The Fund will be mainly invested in financial instruments which will experience market developments and fluctuations. The investor is therefore exposed to the risks below, this list not being exhaustive.

The main risks to which the investor is exposed are:

Capital risk

The risk that the capital invested is not returned in full is inherent in this type of management, since it does not include any capital guarantee.

Risk associated with the investment in Futures Instruments on commodities

The Fund is exposed to the price of commodities through commodities index swaps. It should be noted that a drop in the commodities markets and in exogenous conditions (storage conditions, weather conditions, etc.) may result in a drop in the net asset value of the Fund. In fact, the evolution in the price of a futures contract on commodities is closely associated with the level of current and future production of the underlying product, even the level of estimated natural reserves in the case of energy sector products.

Climate and geopolitical factors can also alter the levels of supply and demand of the underlying product in question, and therefore modify the expected rarity of that product on the market.

Counterparty risk

The counterparty risk is associated with swaps and other derivative instruments contracted by the Fund. The Fund is exposed to the risk that credit establishments are unable to honour their commitments in respect of these instruments. This risk may take concrete form in a drop in the net asset value of the Fund.

Overexposure risk

The Fund may resort to a maximum leverage effect of 1.05. In this case, during market fluctuations, the Fund realises 1.05 times the market fluctuation. Therefore, a position initiated against the direction of the market will produce a loss equal to 1.05 times the market fluctuation.

Interest rate risk

The Fund, through the index, directly or through monetary UCITS selected in order to remunerate the cash position, may be invested in futures contracts on interest rates and/or on fixed-rate debt securities. In general, the price of these instruments falls when rates rise.

The ancillary risk is as follows:

Foreign exchange risk

Swaps are denominated in euros and covered against the foreign exchange risk. The Fund is however, exposed to a residual foreign exchange risk, since the currency hedging transaction in the index is completed just once a day.

CHANGE(S) MADE DURING THE CURRENT HALF-YEAR

As of 2 January 2018, RF units.

CHANGE(S) MADE DURING THE PREVIOUS HALF-YEAR

From 3 November 2017, change to terms and conditions of subscription and redemption: Subscription and redemption requests will be centralised every day up to 12:00 pm with the depositary and will be executed based on the next net asset value but the corresponding payments will be made on the second non-holiday trading day following the net asset value date applied.

Then, on 7 December 2017, since the Diversified classification was being removed on 31 December, it no longer features in the prospectus. No change regarding the strategy and management rules for the Fund.

Lastly, as of 14 December 2017, creation of two new categories of units:

- a unit called the EI C EUR unit reserved for institutional customers who subscribe via the Euronext Fund Services platform;
- a unit called the EP C EUR unit reserved for individual customers who subscribe via the Euronext Fund Services platform.
