

MANAGEMENT DIRECTION

Eligible for the SSP.

Management objective

The object of the Fund is to achieve a performance above that of the Euro Stoxx Reinvested Net Dividends index over the recommended investment period by adopting an SRI approach.

Benchmark

Investors can compare the Fund's performances with those of the calculated EURO STOXX Reinvested Net Dividends index (SXXT Ticker).

The EURO STOXX index is the subgroup made up of the most liquid names in the STOXX Europe 600 index. The index has a variable number of components (around 300) and represents large, medium-sized and small capitalisations in eurozone countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. It is calculated daily. (For more information about this index, go to: www.stoxx.com). However, the Fund's objective is not to reproduce, in one way or another, the performance of this index. It makes investments based on criteria which can result in significant differences in relation to the behaviour of the index.

Management strategy

The Fund investment universe is defined by all of the components of the EURO STOXX index. Based on dynamic allocation, the manager invests in the securities that make up the index for their universe without seeking to apply the same weighting to each security in their index, however. The Fund will mainly invest in the eurozone (90% of its Net Assets) and there will be no sector-based constraints when allocating them.

The investment processes apply both financial and extra-financial criteria in order to favour a "Socially Responsible Investment" (SRI) selection of companies in the portfolio.

- 1) Based on their investment universe, every three months or when required, depending on market conditions, the manager makes a sector allocation based on the volatility of each composite sector and their joint correlations, in order to offset their contributions to the overall risk (financial criterion);

- 2) The manager applies an SRI filter to the components in each sector in order to keep 2/3 of the companies with the best SRI scores for their sector, as established by the SRI team for the OFI group, that are kept (extra-financial criterion);
- 3) Finally, each security is allocated sector by sector on a discretionary basis. However, this is constrained by the initial sector allocation (financial criterion).

The SRI research team carries out a detailed analysis of the environmental and social issues specific to each sector of activity, and of governance issues.

This study is carried out taking into account Environmental, Social and Governance elements, namely:

- the Environmental dimension: direct or indirect impact of the issuer's activity on the environment: climate change, natural resources, project financing, toxic waste, green products;
- the Social dimension: direct or indirect impact of the issuer's activity on stakeholders: employees, customers, suppliers and civil society, by reference to universal values (notably: human rights, international work standards, environmental impact, prevention of corruption, etc.);
- the Governance dimension: processes as a whole, regulations, laws and institutions influencing the way the company is directed, administered and controlled.

Based on the sector-based reference for key issues, an ESG Score is calculated per issuer, which includes, first, the key issue scores (with a weighting of 70% for Environmental and Social issues and 30% for Governance), any penalties associated with controversies not yet integrated in the scores for key issues and any bonuses associated with analysis of the key issues. This ESG score is calculated out of 10. Companies' ESG scores are used to establish an SRI score corresponding to the ranking of the issuer's ESG score compared to other actors in its ICB supersector (level 2). The SRI score is established on a scale of 0 to 5, 5 corresponding to the best ESG score in the sector.

The eligible investment universe is defined using a 'best in class' approach, by selecting 2/3 of the best SRI Scores in each sector within the investment universe for the Fund (Eurostoxx Index).

The Fund can operate on fixed-term or conditional financial instruments traded on regulated and organised markets (French, foreign and/or over-the-counter).

In this context, the manager may take positions with a view to hedging the portfolio against or exposing the portfolio, on a discretionary basis, to equity risks by using instruments such as Futures and Forwards on equity and equity indices, Options on equity and equity indices, and Swaps on equity and equity indices. Total exposure of the portfolio is not intended to be above 100%.

Risk profile

The Fund is classified as "Shares of eurozone countries".

Investors are therefore mainly exposed to the risks below, this list not being exhaustive:

Capital risk and performance risk

Investors are advised that the performance of the UCITS might not conform to their objectives and that their capital might not be returned in full, as the Fund does not benefit from any guarantee or protection of capital invested.

Share risk

The Fund is invested in or exposed to one or several equity markets which may experience large fluctuations, and to small and medium capitalisations which, taking account of their specific characteristics, may present a liquidity risk. Investors' attention is drawn to the fact that fluctuations in the price of the portfolio assets and/or the market risk will result in a significant reduction in the net asset value of the Fund.

Interest rate risk

Because of its composition, the Fund may be subject to an interest rate risk. This risk results from the fact that, in general, the price of debt securities and fixed-rate bonds falls when rates rise. The net asset value will fall if interest rates rise.

Risk model

The management process for the Fund is based in part on using two proprietary models. One of these is used to determine the risk level of an asset compared to other assets in the portfolio, while the other is a non-financial scoring model (including some ESG criteria). There is a risk that these models are not efficient. The performance of the Fund may therefore be below the management objective.

Counterparty risk

This is risk linked to the Fund using futures contracts. These transactions made with one or more eligible counterparties could potentially expose the Fund to the risk of one of these counterparties defaulting, which could lead to a payment default.

CHANGE(S) MADE DURING THE CURRENT HALF-YEAR

As of 19 January 2018, the GIC unit was created and the GRC unit was created.

Then, on 9 March 2018, RF units were created.

CHANGE(S) MADE DURING THE PREVIOUS HALF-YEAR

As of 7 July 2017, the RC unit was created.

Then, on 22 December 2017, the SRR1 was reduced to 5 compared to the previous 6.

FUTURE CHANGE(S)

Nil.

INFORMATION RELATING TO TRANSPARENCY OF SECURITIES FINANCING TRANSACTIONS AND RE-USE

Between 29/12/2017 and 29/06/2018, the mutual fund performed neither securities financing transactions nor total return swaps.

ADDITIONAL INFORMATION FOR INVESTORS IN GERMANY

OFI Asset Management has notified the Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) of its intention to distribute the units of the Fund **OFI RS EURO EQUITY SMART BETA** in the Federal Republic of Germany and has been authorized to distribute the units in the Federal Republic of Germany upon completion of the notification procedure.

Paying and Information Agent

Bremer Kreditbank AG, a bank established under the laws of Germany, having its registered office at Wachtstrasse 16, 28195 Bremen, registered with the Bremen Trade Registry, number HRB 4188, has undertaken the function of Paying and Information Agent for the Fund in the Federal Republic of Germany (the "German Paying and Information Agent")

Information and Documents

For unit-holders resident in Germany, the following documents are available for inspection in hard copy, free of charge and upon request at the German Paying and Information Agent:

- Prospectus
- Key Investor Information Documents
- Articles of Incorporation
- The latest annual report, and the most recent semi-annual report, if published thereafter
- Custody and Administration Agreements
- Paying Agency Agreement

Any other information to the Shareholders will be sent to the Shareholders by post. The issue, redemption and conversion prices of shares will be published on the website: www.ofi-am.fr. Additionally, communications to investors in Germany will be published in a durable medium, further to the requirements of Article 167 of the German Investment Code in the following cases: suspension of the redemption of the shares, termination of the management of the fund or its liquidation, any amendments to the Articles of Incorporation which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool, merger of the fund with one or more other funds and the change of the fund into a feeder fund or the modification of a master fund.

Applications for the redemption and conversion of shares may be sent to the German Paying and Information Agent. All payments to investors, including redemption proceeds and potential distributions, may, upon request, be paid through the German Paying and Information Agent.
